The following is an examiner's statement of reasons for allowance: The prior art does not teach the hybrid electric powertrain as recited in claims 1, 4-5 and 9, which include a generator torque reaction brake means for anchoring a generator when the electromechanical power flow path is disabled and a slipping clutch mechanically connecting a torque reaction element of the gearing to the generator whereby a mechanical power flow path from an engine to the power output member is maintained when the electromechanical power flow path is disabled. This recitation, in combination with the rest of the recited elements, clearly defines over the prior art.
